Fictional sample CV for the Claude Agent SDK challenge. The person, employers and university are made up.

PROFILE

Operations coordinator moving into AI automation. I spend most of my week finding the manual, repetitive parts of logistics work and replacing them with spreadsheets and small Python scripts. Currently completing the TAI Labs AI Internship.

EXPERIENCE

Operations Coordinator Brightline Logistics, London — March 2023 to present

- Built a Google Sheets tracker for around 40 weekly deliveries, which cut missed driver handovers from 9 a month to 2 within the first quarter.
- Wrote Python scripts (pandas) that read the daily CSV export from our CRM and email the team a summary of late and at-risk orders each morning.
- Set up 4 Zapier workflows, including one that creates a Trello card for every failed delivery so the next shift picks it up.
- Onboarded 6 new coordinators and wrote the team's 20-page process guide.
- Main contact for 3 regional depots on scheduling and delivery issues.

Customer Support Advisor Northway Energy, Leeds — August 2021 to February 2023

- Handled around 60 tickets a day across email and live chat, with a 92% customer satisfaction score.
- Proposed and wrote 25 saved replies for common billing questions, still used by the team.
- Helped test a new ticketing system before rollout and logged 30+ bugs for the vendor.

Sales Assistant (part time) Harlow & Co, Leeds, alongside university — 2018 to 2021

EDUCATION

BA (Hons) Business Management, 2:1 Yorkshire Metropolitan University — 2018 to 2021

Dissertation: *How small retailers use customer data*

PROJECTS

FAQ chatbot TAI Labs AI Internship, 2026

A RAG chatbot that answers questions from a 40-page company FAQ. Built in Python with a vector database; tested on 50 real questions from the support inbox.

Delivery delay dashboard Personal, 2024

A Looker Studio dashboard over a year of anonymised delivery data, showing which routes run late and at what times.

SKILLS

Automation: Python (pandas, basic scripting), Zapier, Google Apps Script (beginner)
Data: Google Sheets, Excel, SQL (beginner), Looker Studio
AI tools: ChatGPT and Claude for drafting and analysis, prompt writing
Other: Trello, Zendesk, Salesforce (user level)

CERTIFICATIONS

Google Data Analytics Certificate, Coursera, 2024
